It has come to my attention that a student has a probable case of Pertussis, also known as whooping cough.

I wanted to let you know about the illness because Pertussis is a communicable disease that is passed through nasal discharge, usually through sneezing or touch.

The symptoms of the disease include a cough followed by a high-pitched "whoop." If your child becomes ill and is diagnosed with Pertussis, follow your doctor's instructions for treatment.

If you have any questions or concerns, please contact your doctor or the Macomb County Health Department.

Sincerely,
Brandon Manzella
