

AP PRECALCULUS

Who can take this course?

Any student who has taken Algebra 2
or Acc Algebra 2 with a strong
passing grade

Why should you take this course?

1. Prepares you for college classes
 2. You can receive college credit if you pass the AP Exam
 3. It will prepare you to take AP Calculus

Content Areas

Unit 1: Polynomials & Rational Functions

Unit 2: Exponential & Logarithmic Functions

Unit 3: Trigonometric & Polar Functions

Unit 4: Functions involving Parameters, Vectors, & Matrices

$$\lim_{x \rightarrow 1} \frac{ctgx - 2}{2\pi x^3} \quad S(x \pm a^y) \quad \sum = n-1 \quad A-C =$$
